Information Disclosure Statement

Commissioner for Patents

Washington, District of Columbia 20231

Sir:

Attached is a completed Form PTO/SB/08(A&B) and copies of the pertinent parts of the references cited thereon. Following are comments on any non-English-language references pursuant to Rule 98:

The closest patented invention I have found to mine is that of a "Wireless communications methods and systems using a remote, self-contained communications antenna unit", #20020025836 by Clifford Lee Knight on February 28, 2002. The differences are that my invention will be used indoors instead of outdoors, my invention will cost hundreds of dollars instead of tens of thousands of dollars, my invention will be used as a diagnostic tool instead of a production unit, my invention can be taken apart and will fit into a passenger vehicle.

US Pat. # 5,850,713 by Yukinori Hojo on 12/22/98. This patent is for a "Device raising and lowering apparatus". Although this patent is for a device to raise and lower devices "such as antennas", the patent is centered around the design of a hydraulic mast without specific purpose. My invention is for a system that has specific purpose that includes a manually operated mast as a component.

US Pat. # 5,531,419 by Karl M. Gustafsson on 07/02/98. This patent is for a "Mast base, especially for a temporarily erected mast". Again, this patent centers around the design of the mast and not its specific purpose. Also, the design of this mast keeps it from being mobile once it is erected. My invention maintains mobility even after the mast is extended.

US Pat. # 5,787,111 by William E. Gilmore on 07/28/98. This patent is for a "Transportable communication system". Although this patent is about a device that may have similar components to my invention, it really centers around an outside, production type device for cellular communications as does the Clifford Lee Knight patent application. My invention is used indoors as a testing tool.

Although I have discovered a product marketed as the "Site Survey Extension Pole" by Terrawave Solutions, Inc. I have not found any patent on this product. Although this product addresses the issue of not needing ladders or a hydraulic lift to elevate antennas during a site survey, the product does not address the issue of providing power for the access points and this product loses its mobility once erected.
